

## 3M Auto Tinting

Experience the best

Solar Tech Glass Tinting is the only 3M automotive window film dealer in the Mid-South. We meet the superior standards set by this world renowned company. 3M carefully selects its dealers based on expertise, customer service, and experience in the industry. Solar Tech has consistently been an award-winning, top performing 3M dealer.

At Solar Tech, you'll not only receive the most revolutionary window films available... you'll also enjoy a factory installed appearance by some of the most talented installers in the country. (Robert Lucas has been installing automotive window films for greater than 18 years and has been with Solar Tech Glass Tinting for more than 14years.) In addition to the best window film on the market, we will also provide you with the highest quality installation available. A factory-installed look is our specialty. We truly pride ourselves on our craftsmanship, and with a combined 33 years of experience you'll get the absolute best!

No purple windows. Guaranteed!

---

While most other window film companies buy their polyester from someone else, 3M makes its own polyester in Decatur,

Alabama. During this process, 3M patented a technology for producing its own nano-carbon polyester. This revolutionary and unique process, allows for maximum heat rejection without metals, which can interfere with radio and satellite navigation signals. It also gives our films a beautiful neutral black look with unparalleled color stability. Never before has anyone done this. In fact, it's so advanced that in time-based tests, 3M Color-Stable Auto Film held its color while most conventional dyed films rapidly changed to a purple color. No purple windows. Guaranteed!

We stand behind our work. Color-Stable films are backed by a limited lifetime warranty, which includes color stability.

Look for the 3M print mark on Color-Stable films, it is your assurance of authenticity. You know that your car features authentic 3M Color-Stable Auto Film when you see the 3M print mark on the window itself. Choose us for the best customer service, highest quality installation, and a 3M window film that will perform and last like no other.

3M automotive window film applied to vehicle windows provide benefits in the following three areas:

#### Blocks UV Radiation

- Reduces fading and interior cracking
- Increases Skin Protection

#### Reduces Heat

- Increases air-conditioning efficiency
- Improves occupant comfort
